GATOR 5.7

SHORT CHARACTERISTIC:

The GATOR captivated us through unbelievable light handling. The 5.7 is more maneuver oriented (the larger sizes are more freeride oriented), but is also fun for blasting along. Even in the upper wind range, totally powered up it maintains a neutral feel and is more than easy to hold on to. The lightweight material especially in the head / top of the sail, where the leverage is the greatest, gives the sail a very easy feel and light handling.
